PERSONAL STATEMENT

I am a proactive software developer with about 4 years progressive experience in implementation of realtime websites and web applications. I condsider myself well-versed in technology and writing code to create systems that are reliable and user-friendly. Skilled leader who has the proven ability to motivate, educate, and manage a team of professionals to build software programs and effectively track changes. Confident communicator, strategic thinker, and innovative creator to develop software that is customized to meet a company's organizational needs, highlight their core competencies, and further their success. My goal is to attain a long term career in information technology. Also enhance my professional growth through jobs, projects, seminars and training's that focus on databases, web technologies and system application development thereby contributing to the organisations success.

SKILLS

1. Experience with development tools including:

- HTML5
- CSS
- Javascript
- PHP
- MySQL
- Oracle
- MS Access
- Node.Js
- JAVA
- ASP.NET
- UI/UX Design

2. Experience with working in an "**Agile**" environment during a project management life cycle.

3. Confident problem-solving abilities to overcome glitches with creative solutions that are strategically designed to last long-term.
